Subject: Pricing Discussion

Hello Derrick

To follow up on our phone call earlier this afternoon. This is what I think we came up with on the phone:

One Week Assessment - Veolia would provide two water and two communication experts for a total of 40 hours each at \$225 an hour plus expenses. The product from that week would be a letter or power point presentation reviewing actions taken by the City to date, validating what has been done, making recommendations for other ideas to try, putting a schedule together for those ideas or current efforts if more study or other actions are needed. The City would provide access to staff, consultants and records for review. If a contract can be finalized this might include introductions and data exchange this Friday and then a start on the following Tuesday.

Additional Four Weeks of Assistance - It is not known at this time what type of help will be needed moving forward if any or who from our staff would be required. The City however has asked for a maximum price figure for that assistance. We have simply estimated \$86,400 plus expenses for that period. Any scope of work and fee would be negotiated after the initial week on site when we know more about what is needed.

I hope this matches what you got from the conversation.
